More Profits in Sheep HUERTA REMAINS

Clover Hay and Shelled Corn Make **Excellent Ration**

By C. E. Brashear, Assistant in Animal Husbandry, University of Missouri

to sheep feeders than native sheep. Successful feeders are quite generally agreed upon that fact. The western sheep are freer from disease than native sheep, more uniform in size, age and breeding, and are fattened in large flocks more successfully. Each factor counts.

Lambs Like Compeas Planted in Corn. Sheep selected, rations need consideration. What to feed fattening sheep will depend upon the season of the year and the size and character

Western sheep mean more profits | corn may be fed as ear corn scattered on the pasture field.

Nitrogenous Roughness is Good Feed Sheep will eat more roughage in proportion to grain than cattle. The fattening of sheep will be more certain to result in profit if a nitrogenous roughness is available. Either clover, alfalfa, cowpea, or soybean hay with shelled corn is an ideal ration for fattening lambs, yearlings or wethers. A large number of experiments conducted at many different experiment stations in the United of the sheep. If the sheep are pur- States where such a ration has been chased early in the fall, run them used, have shown this to be one of on good pasture until winter, and a the most efficient and profitable com-

considerable game one namally to see binations available in the corn belt cured at a very

In name wor loss of the state sheep feeders plant covpeas in the corn at the last cultivation, and turn sheep or lambs into the field the latter part of September to eat off the undergrowth. Lambs will not injure the corn, but other sheep will gradually learn to eat from the hill. Indeed, this is a profitable method of fattening yearlings and wethers.

Cowpeas should all be earen off before frost, but rape may be utilized until cold weather.

It is not good practice to feed lambs or older sheep on green undergrowth and change suddenly to a dry ration. It is best to sell them direct from the cornfield. However, corn may be fed with profit during the last two or three weeks while the sheep are still eating the undergrowth. The

No one ration is given such unifermly satisfact and sults for far tening lambs as a ration of corn and clover hay. Figures show that the. without the aud ic. of any othsupplementary ford, is a very satis- solved. factory ration for fattening lambs.

Roots and Silane / re Desirable. The English short od prizes roots above all other ford for the success. ful fattening of sheep and lambs. able in all rations for fattening sheep. Silage is more often fed in the United to be a vry profitable practice. These feeds have reduced the amount of grain required in fattening sheep,

as rye or clover, after it has made its

spring growth. It may be more im-

portant to the land to turn under this

land in the fall. The one great dis-

advantage of fall plowing, outside

of washing, is that it does not allow

the accumulation of organic matter in

the soil to so great an extent as when

the land is spring plowed. Conse-

quently, as lands become more worn

and it becomes more and more neces-

sary to build up organic matter, there

are many cases where fall plowing

will become less common and winter

crops will be grown for turning under

in the spring. On good land, how-

ever, fall plowing is usually desirable

from the point of view of the imme-

A practice which is taking the

place of fall plowing to a certain ex-

tent in M issouri is fall disking of

lands. Where lands are disked in the

fall or early winter, particularly corn-

stalk land, certain of the advantages

of fall plowing are realized. That is,

the ground is made more absorptive

of moisture, bacterial action is stimu-

the spring considerably looser than

when this fall disking has not been

done. The loosening of the surface

with a disk on rolling land tends to

increase washing and it must be used

with discretion on such lands. Farm-

ers are coming more and more to

disk stalk lands either in the fall or

buring of corn stalks will have en-

tirely passed, except possibly on some

Briefly speaking, fall plowing is par-

ticularly adapted to good prairie lands; and deep fall plowing is better

than shallow plowing on any land,

although this depends largely upon

the depth of the soil. From seven to

nine inches would be called a good

depth of fall plowing on average soils.

Where lands lack organic matter or

where they wash, it is more import-

ant to grow a winter cover crop and

turn under in the spring, where this

SOILS WASH HEAVILY.

Soils which are inclined to be clayish or heavy like those found over large sections of Missouri are almost invariably benefited by fall plowing This statement is particularly true of land that is to go to corn. The freezing of the overturned soil puts it in much better tilth than land not fall plowed. The fact is a common observation of farmers. There are other benefits, however.

Soils which are plowed in the fall are more absorptive of moisture during the winter; they retain moisture better during the spring and early summer; and the bacterial activity is favorably influenced. Consequently. land which is properly fall plowed lated, and the land comes through in wiff almost invariably produce a larger corn crop than will springplowed land.

It is true with plowing as with al farm operations, that one cannot always plow at just the time or in just the manner which is best, because of various practical difficulties, such as labor troubles, weather inter ferences. Therefore, much land is spring-plowed in Missouri which had best be fall-plowed, if it were possible to adjust farm operations.

There are some cases where fall plowing is not advisable. One of these is where land is so rolling as to wash badly. There is no doubt that fall-plowed land washes more than stubble or sod land, but as compared with corn-stalk land this is not true. Naturally, much depends upon the manner in which fall plowing is done. In the first place, it should be deep and the land should not be worked down after plowing. The surface ould be rough so as to absorb the Water that falls-and to prevent run off. When land is fall plowed and worked down, washing is greatly in-ereased. Land plowed deeply, therefore, and left rough may wash no worse than more level land improp-

erly plowed. Every man must determine for him-self, however, whether or not his land will stand fall plowing. As a matter

his wheat. Top dressing or wheat is not only a great benefit to the wheat erop itself, but almost always insures a stand of the grass or clover crop following. The farmer who handles much live stock must from this time forth give much more attention to the case of burgard manure. The day has peaced when one can affert to make haraged manure as the gran-

NO QUORUM IN THE CONGRESS

Session Adjourned for the Day to Give Huerta More Time-Bryan Stopped British Warships on Way to Mexico.

City of Mexico, Nov. 22.-The bulk of the evidence at hand continues to indicate that Victoriano Huerta is unalterably determined not to accede to the demands of the United States government for his elimination as president of Mexico; but there is some basis for the belief that he may at last give in, but in such a manner as to leave the impression that he acted of his own free will, defying Washington to the last.

The high handed parliamentary practice in the chamber of deputies gave rise to considerable speculation. The roll of members was called and it was evident that the number neces sary for a quorum was present but Colonel Victor Corral, presiding in the absence of Eduardo Tamariz, the speaker who was said to be ill, dedeputy protested and the chamber tood adjourned

It was suggested that this action night be part of a plan to bring about the death of congress and thus split hairs with the Washington government which, through John Lind, President Wilson's personal representative had insisted that this new legislative lide should not come into e stence.

Under the law should there be no quorum three times in succession, the house would be automatically dis-One Mexican, speculating upon the metive for the adjournment, suggested that it was merely a time saving device, adding: "Time for itterta is fine spun gold."

It became known that Manuel Roots are not wdely grown in Garza Aldape, prior to his expulsion America, but are exceedingly desir- from the cabinet, submitted for the consideration of the United States a proposition signed by President States than are roots. Feeding roots Huerta that congress should meet, and silage with grain has been found merely for the transaction of three by the American experiment stations or four measures, namely ratification of the decree of October 11 dissolving congress; declaring the election of president and vice president null thus adding to the profit of the pur- and calling for new elections and, because there might arise the question as to the legality of the new chamber and senate, calling an election for deputies and senators as well. It was understood that after these measures had been acted on the new congress would adjourn and the nation again would await the results of elec-

> For this reason it is not believed that the no-quorum rule will be carried out indefinitely and that it was used merely as a matter of sparring for time.

> That a British cruiser squadron Cruz on representations made by Sir Lionel Carden became known here. it was also learned that a counter order was made as the result of an energetic communication from Secre tary of State Bryan to the British ambassador at Washington.

> Secretary Bryan, according to cablegrams reaching here, gave the British ambassauor to understand that the United States would regard the presence of a British squadron in Mexican waters undesirable and as a result the order was changed to pro vide for one boat to proceed to Tampico or some other Gulf port.

CAN'T STOP REBEL MURDERS that Mr. Ladow is arrogant.

The Constitutionalist Generals Cannot Be Controlled by General Carranza, it is Said.

Nogales, Ariz., Nov. 22.-It has been spring before plowing, cutting up the learned from authoritative sources stalks and working them into the that the principal reason why the soil to save the organic matter to the conferences here between William land. The time is coming when the Hayard Hale, President Wilson's personal representative, and General Carranza broke up was the failure of General Carranza to give the American government assurances that accepted rules of civilized warfare would be observed by the Constitutionalists if they were allowed to import arms and ammunition.

THREW ACID IN GIRL'S EYES

A Young Woman of Cedar Creek, Neb., Attacked in a Room at a Hotel.

Cedar Creek, Neb., Nov. 22 .- Miss irene Sweem was attacked in her room at the Cedar Creek hotel here. Her throat was cut and her sight perhaps permanently was destroyed by acids Her condition is dangerous She accuses James Biddlecomb, a former employe of the Nebraska Lightning Company, and the latter is being sought by several posses.

The Rt. Rev. Aldan Gasquet, head of the Benedictine order of England, has the gigantic task of revising the Vulclared there was no quorum. Not a gate, the Latin Bible of the Roman Catholic church. The committee of revision of which he is the head has already been at work on it for five years and will not complete it for about seven years more. Abbot Gasquet is now in this country delivering lectures and raising money to complete the work.

FEDERAL PRISON SHAKEUP

SU. ERINTENDENT OF CONSTRUC-TION RESIGNS.

Former Deputy Warden Files Charges Against Head of Board of Parole.

Leavenworth, Kan., Nov. 25 .- C. H. McGlassen, a special agent of the Department of Justice, came to Leavenworth unheralded, following the receipt in Washington of charges preferred against Robert V. Ladow, superintendent of prisons and president of the federal parole board, by W. H. Mackey, whose resignation as deputy warden of the Leavenworth institution was requested by Attorney General McReynolds. The charges preferred by the deposed deputy warden were sensational in several particulars, especially as regards the construction department.

Mr. McGlassen had been in the city only a few hours when Alva Cole, for the last two years superintendent of construction at the institution, was requested to resign.

Mr. Cole immediately telegraphed the attorney general that he would resign, the resignation to take effect at 6 o'clock at night. Mr. Cole said was ordered from Barbados to Vera that the attorney general suggested that he resign, as there might be im provement in the construction department with his retirement.

The charges against Mr. Ladow by Mr. Mackey were by letter to Attorney General McReynolds, dated November 6. A copy of the latter was also sent President Wilson.

Mr. Mackey charged that "Mr. Ladow is egotistical, arrogant, negligent, extravagant, shows favoritism between prisons, is incompetent, visionary and totally unfit for the position he holds. Personally, he knows nothing about the Leavenworth federal prison.

Particularly in the matter of granting paroles does Mr. Mackey charge

A BATTLE SOUTH OF JUAREZ

Federal General Salazar and His Force Reported Surrounded by Villa's Troops.

El Paso, Tex., Nov. 25.-A general federal attack, front, right and left flank, delivered practically simultaneously by Generals Salazar, Rojas, Caraveo and Landa, drove in the skirmish line of General Francisco Villa and has developed separate engagements below Bauche, on the west at Tierra Blanca, on the front, and along the border opposite Belen and Ysters, Tex., to the east.

More than 10,000 rebel and federal troops are engaged in the three batties. Of this number General Villa daims to have 7,000 in his command, while the federals are reported to maber about 4,000.

eres, Mex., Nov. 25.—At 11 ck at night Federal General Jose Balazar's command was com-thy surrounded south of Saragoea his capture was expected me-
